TANK SEARCH CERTIFICATE

Dear Property Owner,

This document certifies that a full property search for a residential underground storage tank (RUST) took place at 1936 Peters Rd, North Vancouver, B.C. V7J 1Y9 on April 26, 2012.

Perimeter Oil Tank completed the following scan:

- Contacted the District Plumbing Department and discussed the site in question. Determined if the records stated if there was a plumbing card with an oil-burning furnace installed at the above property during new construction of the residence.
- Walked the entire property and performed a visual search for a filler pipe or vent pipe. Then we scanned with a Schonstedt GA-92XT magnetic locator. This unit can locate steel up to six feet in depth and is one of the best locators on the market. For specifications go to <http://www.schonstedt.com/index.cfm?page=GA-92XT>

Using the above techniques and with our experience, NO OIL TANK was found.

Perimeter Oil Tank prepared this report exclusively for our client, the property owner and the District of North Vancouver. Perimeter Oil Tank accepts no responsibility and denies any liability whatsoever, for any injury, loss or damage suffered by third parties arising from their use of, reliance upon, or decisions or actions based on this report.
